Office of Research and Development

September, 1974
Vol. VII, No. 3

GRANTS, AWARDS, AND CONTRACTS

The Western Ohio Branch Campus of Wright State University will receive \$12,754 from the Ohio Board of Regents in support of the "Developmental Education" program. Dr. James Noel will supervise Project #337.

* * * * *

The University has contracted with the Ohio Department of Education to conduct a "Summer Workshop" and "Development of Multi-Media Instructional Unit." Mr. Wylie Graham will direct Project #338 with Warren Abraham, Dean of the College of Continuing and Community Education as supervisor. The program is supported with \$5,814 of state funding.

* * * * *

Dr. John R. Beljan has received a grant from the Ames Research Center, National Aeronautical and Space Administration, in the amount of \$17,020. Project #339 is a study "Medical Applications of Space-Related Research: Calcium and Bone." As with a lot of the National effort, such "spin-off" is in line with the present effort toward technology transfer.

* * * * *

Dr. Harold Silverman has an agreement with the State Department of Mental Health and Mental Retardation to conduct a program, Project #340, "Community Mental Health Training with Educators." This is a cooperative program involving Montgomery, Miami, Preble, Darke, Logan, Champaign, and Shelby counties. These county units are contributing proportional shares to support the \$23,936 budget requirements for this educational delivery system by improving the role of the educator in the early diagnosis of emotional and psychological problems and the attendant referral procedures.

* * * * *

Wright State University is to receive \$65,747 in support of the "Developmental Education" program which is directed by Dr. Anne Shearer. This program is supported by the Ohio Board of Regents through additional subsidy to the university. Project #341.

UNDERGRADUATE
OPPORTUNITIES

The National Academy of Sciences bulletin on Fellowship Opportunities published this spring lists the following programs avail-

able to undergraduates:

Atomic Energy Commission Summer Student Trainee Program -- available to juniors and seniors majoring in the physical and life sciences, engineering and mathematics.

National Achievement Scholarship Program for Outstanding Negro Students -- 225 nonrenewable \$1,000 awards and 100, 4-year awards.

National Merit Scholarship Program -- 1,000 nonrenewable awards and 2,000, 4-year awards.

National Science Foundation -- (1) NSF Undergraduate Research Participation (2) NSF Student-Originated Studies.

Rotary Foundation Undergraduate Scholarships - a year of study abroad - unrestricted field of study.

Society of Exploration Geophysicists (SEG) Foundation Scholarships and Grants-in-Aid for career students in geophysics.

Hattie M. Strong Foundation -- Applications between January 1 and March 31 each year. Unrestricted fields - Student loan fund.

U.S. Office of Education -- (1) Student Loan Program (2) Grants to \$1,500 (3) Guaranteed Loans (4) College Work-Study Program (5) Modern Foreign Language Undergraduate Fellowship Program - NDEA Title VI.

U.S. Public Health Service (1) Nursing Scholarship Program (2) Nursing Student Loan Program.

Westinghouse Science Talent Search (High School Seniors).

White House Fellows Program.

SCHOLARSHIPS AND
FELLOWSHIPS

The Federal Highway Administration has announced that it will award scholarships and fellowships for 1975-76 for graduate

study in highway safety, traffic engineering, education and research, and for undergraduate study by transportation personnel to study disciplines related to their occupations. The deadline for submitting application is December 31, 1974.

GRANTS, AWARDS, AND
CONTRACTS
"AN EXPLORATION IN \$'S

An unofficial summary from project accounting records for fiscal 73-74 taken from the June 30, 1974 report reflects expenditures on grants, contracts and awards processed through the Office of Research Development to be \$1,058,118.43 with encumbrances in the amount of \$216,612.71 for a total of processed funding in the amount of \$1,274,731.14.

Of this amount, \$485,544.78 (expended and encumbered) was in direct support of faculty and students in the form of salaries and wages paid. Student wages do not include the federal portion of the work-study support. An additional \$78,677.81 has been expended or encumbered for benefits relative to the wages and salaries paid.

Included in these supported grants and projects was \$227,598.00 for equipment of all types - research, instructional, audio-visual, furniture, and library media.

Over \$16,000 was received to support travel of all types.

Approximately \$50,600 has been expended for various and sundry supply items.

Indirect Costs to the university - expended and encumbered - have accrued in the amount of \$220,157.45.

As of this June 30th summary there was in fund balances plus encumbrances an amount of \$1,228,129.00 of unexpended funds. This amount does not include a number of awards received in June and July which have been announced by Research News.

This is not the final and official summary for fiscal 73-74 and, therefore, the figures used may be subject to change when all accrued costs are applied and final balances determined.

\$ \$ \$ \$ \$

FEDERAL
FUNDING

Out of a total \$2,575,670,000 of federal obligations to the top 100 colleges and universities, in terms of funds received, Ohio institutions received 3.185% or \$82,056,000 in FY 1973.

Recipients in this top 100 were OSU - \$44,134,000; Case Western Reserve - \$21,967,000, and University of Cincinnati - \$15,655,000.

The U. S. Department of Agriculture showed the largest gain in terms of funds available for Research, Development, and Training.

MARSHALL FUND
COMMON PROBLEMS
FELLOWSHIP PROGRAM

There will be approximately eight fellowships available from the Marshall Fund program to support scholars whose work is designed to contribute to the better

understanding and resolution of significant contemporary or emerging common problems of industrial societies, particularly their comparative, international, social, political, and economic aspects. Such problems will involve U.S. and European interests in all cases but may also be concerned with other industrial and developing societies as well.

Appointments may be to scholars in any academic field or profession and will be for full-time devotion to the project during the appointment period.

Applications must be submitted by October 31, 1974. Announcement of appointments will be made about January 1, 1975.

Projects may be for an academic term up to a year or more. Fellows are also asked to seek support from other sources to fund their total activities.

Examples of projects presently receiving support are:

International Public Television Coordination
European Television Journalism
Environmental Program International
Labor-Management in the Auto Industry
Land Use and Urban Planning
World Population Management
Resource Recovery
Urban Communications
World Inflationary Problems
Soviet East-West Policies
Food Reserves Policies
International Energy Alternatives
European Communities and Atlantic Activities
European/American Comparative Studies

RESEARCH PROJECT
GRANTS

The National Institutes of Health support projects in a wide variety of research activities. Proposals should be directed toward the research goals of the various institutes and divisions of NIH.

The university now has several projects which are supported by NIH. With the programs of Environmental Health, Medical Technology, Nursing, and the soon to be Medical Program, there should be additional programs that faculty may propose.

Deadline for application is October 1, 1974.

ENVIRONMENTAL RESEARCH Grants are awarded to support research, development, and demonstration projects directed at meeting specified objectives established by the Environmental Protection Agency. Application may be made by a direct proposal to a Task to be funded by E.P.A., an unsolicited proposal, or in response to Request for Proposals (RFP) published in Commerce Business Daily.

The next deadline is October 1, 1974 for proposals.

Of interest to E.P.A. are the following:

Program elements:

- Health Effects - epidemiological studies, toxicological, teratological research, etc.
- Ecological Effects - studies of terrestrial and aquatic ecosystems, both biotic and abiotic, as impacted by pollutants and toxic substances
- Transport Processes - meteorological research, pollutant pathways, physical/chemical phenomena, eutrophication, etc.
- Measurements and Instrumentation - analytical methods development, trace contaminant detection, instrument development
- Criteria Development - documentation of pollution effects, air/water quality standards development
- Water Supply - research on drinking water standards, protection of tap water quality, water treatment
- Municipal Water Control Technology - advanced waste treatment, water renovation, storm and combined sewer overflows
- Industrial Water Control Technology - industrial water pollution control
- Non-Point Source Water Control Technology - mining and agricultural water pollution control, control of oil and hazardous material spills
- Solid Waste Technology - processing and disposal of municipal, industrial and agricultural solid wastes, source reduction, recycling
- Stationary Source Air Control Technology - sulfur oxide, nitrogen oxide, particulate control technology
- Implementation Research - cost/benefit implications of alternative environmental protection strategies, environmental management innovations
- Environmental Studies - delineation of anticipated long-term environmental impacts of various activities, environmental forecasting
- Monitoring - measurement standardization and quality control, remote sensing methods, review of Agency monitoring programs

YOUTHGRANTS
HUMANITIES

The National Endowment for the Humanities supports a program similar to the NSF-SOS program mentioned elsewhere in this issue of Research News. These programs, developed and conducted by students with faculty advisors, should be clearly related to the humanities, must have specific purpose and design, and show promise of helping individuals develop this critical faculty. Deadline for proposals is November 15, 1974. A preliminary proposal should be submitted by September 15, 1974. First notice carried in July Research News.

* * * * *

Now it's robbing Patricia to pay Pauline.

GRADUATE
FELLOWSHIPS

The National Science Foundation awards fellowships for graduate study in a limited area. These carry a \$3,000 cost-of-education allowance to the institution where applicant is to study in lieu of all tuition and fees. Fellowships provide \$300 per month or \$3,600 per year for up to three years of study.

Perhaps some of the undergraduates or graduates in the SOS programs could enlarge on these programs for continued support of their program of study.

Deadline for application is December 2, 1974.

HUMANITIES
EDUCATION
PLANNING AND
PROJECTS

The National Endowment for the Humanities supports programs directed at improving the teaching of humanities. There is at present an emphasis on relating the humanities to contemporary questions of values and to problems of national concern.

These grants generally are less than \$30,000 and require 20% matching funds. They may be used in planning of program or planning new developmental approaches to instruction.

Deadline for proposal is November 1, 1974.

RESEARCH
PROGRAMS

The NEH provides assistance, through grants, in support of original thought and basic research for projects in the humanities, including the social sciences, which have humanistic content and employ humanistic methods. Priority is presently centered on projects relating to major issues of contemporary public concern and the Bicentennial and its significance to present national life. Deadline is November 18, 1974.

UNDERGRADUATE
RESEARCH

The National Science Foundation has funded two projects under the Student Originated Studies at Wright State University. These projects originated through Chemistry and Biology faculty guidance of student proposers. These have provided study opportunities for several students this summer.

Deadline for proposals for next year is November 15, 1974. Check with the Office of Research Development for the latest information as to areas of interest that are most appropriate for 1975 projects.

INSTRUCTIONAL
EQUIPMENT

The National Science Foundation approved two proposals of the university under the Instructional Equipment program for 1974. Computer Sciences and Biological Sciences received matching funds to support purchase of equipment for improving certain programs of study.

The deadline for proposals for 1975 awards is December 13, 1974. Now is the time to start planning any improvement that might be advantageous to the department. The university is permitted to submit five or six proposals depending on whether WOBC makes an entry.

SUMMER STIPENDS
'75 - NEH

The National Endowment for the Humanities has announced October 15, 1974 as the deadline for application for these summer stipends. An applicant must be nominated by the president, the dean, or the department chairman through one of these offices, by the university where he or she is employed.

Each institution is entitled to make three nominations, two who are in early stages of their careers and one who is more advanced. The professional degree must be accomplished by the date of application.

Branch campus faculty must apply through the parent university.

Two months of full-time study are provided for with a grant of \$2,000.

The project may be study or research in the special area of interest of the applicant or in some other area that will improve his pedagogy.

Further information is available in ORD.

FELLOWSHIPS
HIGHWAY SAFETY

The Federal Highway Administration through the National Highway Institute awards fellowships for graduate study in highway safety. Fellows choose their place of study from those institutions which have qualified programs in highway and traffic engineering with emphasis on highway safety standards.

U.S. -AUSTRALIA
COOPERATIVE PROGRAM

The National Science Foundation supports seminars, workshops, long- and short-term visits under the U.S. -Australia Cooperative Science Program.

Subject areas for Seminars and Workshops should be of mutual interest to both countries. These should be arranged for small groups of scientists to exchange information or develop collaborative research. Travel funds and subsistence are provided for cooperative research visitors.

JAPAN
FOUNDATION

The Japan Foundation has been operating
in the United States for just over one year.
The Foundation hopes to support the fol-

lowing types of operations relating to the U.S.:

1. Cultural and educational fellowships providing for a two-way exchange of persons between Japan and the United States;
2. Programs aimed at assisting the study of Japan and promoting knowledge of the Japanese language;
3. Cultural exchanges in a variety of fields such as, art, music and drama; and
4. Programs providing for the preparation, collection, exchange, and distribution of materials relating to Japanese culture.

The operations are catagorized into the following programs:

Fellowship Programs

Professional Fellowships

Research
Retooling
Developmental
Short-Term Visitor

Graduate Fellowships

Language
Dissertation

Institutional Support Programs

Visiting Professorships
Conference Program
Staff Expansion Program
Library Support Program
Teaching Materials Program
Research Program
Retooling Program
Developmental Program
Intensive Summer Programs

Cultural Exchange Programs

All formal applications must be preceded by a preliminary proposal.

November 15 is the deadline for submitting formal proposals.

Call Office of Research Development for more information.

* * * * *

Laughter has no accent.

U.S. DEPARTMENT
OF LABOR

The five divisions within the Office of Manpower Research and Development signify by their titles the responsibility of each.

Division of Operational Control and Special Grants. This division is responsible for administrative tracking of plans and funding actions and for the doctoral dissertation, small research grants, and institutional grants program.

Division of Research Methods and Services
Division of Program Demonstration
Division of Experimental Operations Research

These three divisions are responsible for providing support for research, demonstration, and experimental projects, and for monitoring projects funded in these areas.

Division of R & D Utilization

This division is responsible for promoting utilization of the information obtained through the various projects funded by the office.

COMPROMISE SCHOOL
AID BILL

The compromise school aid bill has been sent to the President for signature. President Ford indicated in the joint session he will sign in a few days.

A number of the old programs - including bilingual and adult education, ethnic studies, etc. - are continued. The program for education of the handicapped is continued and enlarged. New programs, including women's educational equality, reading improvement and gifted children, have been added.

The Office of Research Development will try to keep you aware of developments in these programs so that it may be possible to take advantage of these funding sources.

A smile is an expression known to all.

* * * * *

Remember when milk money was that provided
to the kids for their refreshment break?

WATER RESEARCH
AND TECHNOLOGY

This new agency known as the Office of
Water Research and Technology continues
to support projects under the Matching

Grant program. Proposals are submitted via the Water Resources Center
at The Ohio State University for preliminary review. These, following ap-
proval, are submitted to the OWRR, U. S. Department of the Interior. These
grants may be from \$10,000 to \$50,000 per year of Federal funds for as much
as three years.

Proposal deadline for a draft proposal to the Water Resources Center
is October 1 with the formal proposal deadline being October 21, 1974.
OWRR deadline is November 1, 1974.

Complete information and format for proposals are on hand in the Office
of Research Development.

FUND FOR
IMPROVEMENT OF
POSTSECONDARY
EDUCATION

The Fund for Improvement of Postsecondary
Education awarded 128 grants totalling
\$10,000,000 to 102 institutions and agencies
from among 2,800 applicants.

The Dayton-Miami Valley Consortium received \$238,997.

Bowling Green State University received \$34,737 for faculty development.

The University of Experimenting Colleges and Universities at Antioch
College received \$65,645.

Case Western Reserve University received \$119,590 for student learn-
ing studies.

HIGHER EDUCATION
ASSISTANCE

The various funding sources for student aid
in higher education have provided funds as
follows:

<u>FUND</u>	<u>OHIO</u>	<u>TOTAL</u>
Supplemental Educational		
Opportunity Grants (SEOG)	\$ 9,052,285	\$208,342,278
National Direct Student Loans		
(NDSL)	\$14,260,041	\$285,054,435
College Work-Study (CWS)	\$11,585,372	\$268,196,290

Ohio received approximately 4.58% of the expended funds.

AGENCY
SUPPORT

There are a number of agency programs for support of a wide variety of university projects which do not have fixed deadlines and may be overlooked as sources of extramural funding. Proposals may be submitted under these programs at any time. Some of these programs may or may not be funded by legislative action for the coming year. Some may set deadline dates for special areas within the overall program during the year.
